

The Indiana Telephone Privacy Law has been a "god send" to us. Please do NOT change it to allow my bank or any other organization to use my telephone, which I pay for, to disturb my life. The peace we have at our dinner table has allowed us to have meaningful and undisturbed family conversations.

Thank you for your time and willingness to listen to feedback. I urge you to leave the present system alone. It works and works well for us, the people of the state of Indiana. Please don't let the tail wag the dog.
